José Daniel Camacho

Junior Frontend Developer

Hi!! I have been programming for 3 years, learning web technologies like JavaScript and React. I consider myself hard-working and empathic with my co-workers. I got skills to identify and solve problems. I started to work as a freelancer one year ago, until today I made some landing pages and collaborated in the development of a dashboard (do it with react).

MOST RECENT EXPERIENCE

❖ **WeatherApp** for a Hackaton

June 2022

Participated in a midudev developer hackathon, where I made a weather app with a partner. Link of the app
